Projects

BakedDelight

This is a REST API developed by a team of 5 members within a span of 5 days, which allows customers to browse products, save them to a cart for future use, and perform basic CRUD operations.

Features: Login & Sign-Up Module | User Module | Product Module | Category Module | Cart Module | Order Module | Bill Module

Tech Stack: JAVA | SpringBoot | Hibernate | Maven | MySQL | Swagger

Area Of Responsibility: led the team and created User Module and Product Category Module.

Online Banking System

The Online banking system is about maintaining bank accounts, withdrawing, and depositing money. The bank provides account numbers to the client for transactions within the bank.

Features: Login & Sign-Up | Accountant Module | Customer Module

Tech Stack: JAVA | JDBC | MySQL

Fiverr Clone

Fiverr is a popular online marketplace for freelancers. This website allows freelancers to offer their services and customers to purchase these services. Our team of 4 members worked collaboratively to develop this project in 5 days

Features: Home Page | Login & Sign-Up Page | Product Page | Cart Page | Payment Page

Tech Stack: HTML | CSS | JavaScript | Bootstrap | jQuery | Tailwind

Area Of Responsibility: led the team and created a product page with sorting and searching functionality.
